

Greetings,

Farming rabbits for food is so distasteful that I must submit my appeal to vote "no" on this legislation. After cats and dogs, rabbits are the most common of our pets. My daughter grew up with a rabbit. Like dogs and cats, these animals provide comfort and support and teach valuable lessons in caring for another life. We are not so deprived of protein that we now need a new source like this.

I urge you to vote against HB5263.

Sincerely,

Janet Epstein
